

Mohammad Shamsheer Ali

Bangladesh Institute of Nuclear Agriculture (BINA), Bangladesh

Mohammad Shamsheer Ali is Director General of the Bangladesh Institute of Nuclear Agriculture (BINA). He received his PhD in molecular biology from the University of Newcastle with a research focus on improving crop stress tolerance. Mr Ali also has a background in agriculture with specialization in plant breeding.

Before joining BINA, he worked at the Bangladesh Rice Research Institute for 30 years in different capacities, lastly as Director of Research. Mr Ali leads BINA's research in the area of food security in the context of global warming. In 2016, under his leadership, the institute received the Islamic Development Bank Science and Technology Award and the National Environment Award for outstanding contribution to science and technology.
