

Fiona Reilly

Atlantic Superconnection Corporation, United Kingdom

Fiona Reilly is an international nuclear expert with over 20 years' experience in the international nuclear market, including development, structuring, international regulatory development and compliance, licensing and financing. She has worked on all aspects of the nuclear cycle from new build and licensing to decommissioning, fuel storage and waste management. She has a detailed understanding of the international regulatory framework within which the nuclear industry works and frequently advises on liability regimes and nuclear insurance, regulatory and reporting requirements, the development of regulatory regimes, feasibility studies and structuring as well as the financing, development, construction, operation and maintenance of nuclear stations and the fabrication, reprocessing and storage of nuclear fuel and waste. Ms Reilly is recognised as an expert in the development and financing of nuclear projects by the IAEA and has served as a designated expert on the financing, development and structuring of nuclear projects at special meetings of the Agency. She has also served as an IAEA expert on decommissioning and waste management, chaired technical meetings and sits on IAEA committees. Ms Reilly is designated as an expert by the International Framework for Nuclear Energy Cooperation and the International Project on Innovative Nuclear Reactors and Fuel Cycles.
