

# Clement Bataille

**Assistant Professor, Ottawa University, Canada**

Mr Bataille is assistant professor at the department of Earth and Environmental Sciences at the University of Ottawa where he established the SAiVE Group (Spatiotemporal Analytic of isotopes Variations in the Environment).

The SAiVE group works on developing isotope tools and numerical methods to:

- (i) trace the provenance of individuals in ecology and forensics applications;
- (ii) understand weathering processes at the regional to the global scale; and
- (iii) reconstruct paleoenvironments during greenhouse periods.
