Fax (043-1) 280 56 87

№ 3425 *u*

The Permanent Mission of the Russian Federation to the International Organizations in Vienna presents its compliments to the Secretariat of the International Atomic Energy Agency and has the honour to request to circulate among all IAEA Member States as soon as possible the following information.

Ukraine continues to carry out attacks against Russian nuclear facilities. At 13:05 on September 25, 2025, the armed forces of Ukraine carried out an attack using a UAV on the Kursk NPP-2. The UAV was suppressed by the means of radioelectronic warfare and, as a result, the device fell on the Kursk NPP-2 construction site and detonated. The cable tunnel leading to the backup boiler room was damaged. The radiation background at the industrial site of the plant and the surrounding area did not change and corresponds to natural radiation background.

The ongoing Ukrainian provocations against Russian nuclear power plants continue to pose a direct threat to their nuclear safety and security. Responsibility for such criminal actions lies entirely with Ukraine and its supervisors.

The Permanent Mission requests the Secretariat to promptly circulate this Note Verbale as an information circular of the IAEA.

The Permanent Mission of the Russian Federation avails itself of this opportunity to renew to the IAEA Secretariat the assurances of its highest consideration.
