

Opportunities for exhibitors

The IAEA is organizing the International Symposium on Trends in Radiopharmaceuticals (ISTR-2023) at the IAEA Headquarters in Vienna, Austria from 17 to 21 April 2023.

Approximately 400 participants from IAEA Member States and international organizations are expected to attend the symposium. The IAEA is planning to hold an exhibition for commercial vendors in the fields in conjunction with the symposium. A limited amount of space will be available for the vendors' displays/exhibits during the symposium.

Each company will have, free of charge, an exhibition space of 6m² (3x2m) including one table (80x160cm) and 2 chairs. Alternatively, professional booths with walls can be rented from an outside company.

Companies wishing to take advantage of this opportunity to exhibit are encouraged to make a voluntary contribution to the IAEA in support of the symposium. The contribution will be used for the costs directly related to the organization of the symposium. An acknowledgement of the voluntary contribution would be made in the distributed symposium programme booklet given to participants upon registration.

In view of space limitations, the selection of exhibitors will be based on a 'first come first served' basis. Therefore, interested parties should contact the Scientific Secretariat by e-mail ISTR2023@iaea.org before **30 September 2022**.

Further details on logistical arrangements for the exhibition will be sent to the exhibitors after their pledges have been received.
