

67th IAEA General Conference

IAEA Coordination Activities on Nuclear Fuel Development

ESPACE event during the 67th IAEA General Conference
27th September 2023, 14:30–15:30, Espace M0E, M Building, Ground floor

The event will present the ongoing IAEA coordination activities on nuclear fuel development, including Coordinated Research Projects on:

- Testing and Simulation for Advanced Technology and Accident Tolerant Fuels (CRP ATF-TS);
- Fuel Materials for Fast Reactors (FMFR):

Standardization of Subsize Specimens for Post-Irradiation Examination and Advanced Characterization of Fuel and Structural Materials for Small Modular Reactor and Advanced Reactor Applications.

Presentation

Anzhelika Khaperskaia

Technical Lead for Fuel Engineering and Nuclear Fuel Cycle Facilities, Nuclear Fuel Cycle and Materials Section, Department of Nuclear Energy, IAEA

Ki-Seob Sim

Nuclear Fuel Engineering Specialist, Nuclear Fuel Cycle and Materials Section, Department of Nuclear Energy, IAEA

Q & A Session

The e-Learning Modules on Nuclear Fuel Engineering, Fabrication and Operation
