

# Grenada

IAEA Member State since April 2018

## Selected achievements

**2023:** The National Water and Sewerage Authority successfully established competencies in isotope hydrology and now has field equipment to assist in the collection of water samples.

## National priorities

- Human health
- Water and the environment
- Food and agriculture
- Radiation safety and nuclear security
- Energy planning

## Main areas of IAEA support

- Water resources management

## Project successes

### Water resources management

Grenada's capacity for effective water quality monitoring received a significant boost when the IAEA provided field equipment to collect water samples.
