

#ICARST2025 Side Event 5:

Collaboration in Action: Advancing Research Through Coordinated Research (CRP)

The IAEA fosters global research and development of nuclear science and applications by bringing together institutions from Member States to collaborate through Coordinated Research Projects (CRPs). This dynamic side event will showcase how CRPs drive innovation and impact through international collaboration. The session will also cover the CRP application process, intellectual property considerations, success stories, best practices, and opportunities for researchers and institutions to engage in collaborative research that accelerates scientific progress.

Mr Jean-Pierre Cayol
Departmental Programme
Coordinator (NA), IAEA
(Chairperson)

Ms Hannah Affum
