Mr Martin Elsner

Full Professor of Analytical Chemistry and Water Chemistry
Technical University of Munich, Germany

Mr Martin Elsner is Full Professor of Analytical and Water Chemistry and Director of the Institute of Hydrochemistry at the Technical University of Munich (TUM). He specializes in developing analytical methods, particularly compound-specific isotope analysis, to study the fate of chemicals and microorganisms in the environment. His research supports better management of environmental contaminants and optimization of processes in technical systems. He has published over 175 scientific papers.
