ATOMS  
FOR  
WATER

**Mr Kiattipong Kamdee**

Nuclear Scientist

Thailand Institute of Nuclear Technology

Mr Kiattipong Kamdee has over 20 years of experience in isotope hydrology applied to environmental and groundwater studies. As Leader of the Isotope Hydrology Laboratory in Thailand, his research focuses on the application of isotopic and related techniques for groundwater management, contamination assessment, hydrological cycle studies and food adulteration analysis. The laboratory also provides isotope analysis services to government agencies, companies and private clients. He has served as National Project Coordinator (NPC) for several IAEA-supported projects, contributing to international cooperation in isotope hydrology.
