

Ms Jana Ólavsdóttir

Geologist

Faroese Geological Survey, Denmark

Ms Jana Ólavsdóttir is a research geologist at the Faroese Geological Survey (Jarðfeingi), where she has worked since 2003. She holds B.Sc., M.Sc. and Ph.D. degrees in geology from the University of Copenhagen. Her research focuses on volcanic basin evolution, reservoir characterization for hydrocarbons, groundwater, geothermal energy, and CO₂ storage. She leads projects on groundwater and geothermal energy, advising the Faroese Government on related research, administration, and legislation. She also serves on the Programme Committee for Research and the Aid Scheme for the Labour Market Campaign at the Research Council Faroe Islands.
