

**Ms Asunción Romanelli**

Professor

Institute for Marine and Coastal Research, Argentina

Ms Asunción Romanelli is an Environmental Researcher at the National Scientific and Technical Research Council (CONICET), Argentina. Her research focuses on isotope hydrology, groundwater-surface water interactions and water resource management, with particular emphasis on nutrient pollution and eutrophication in groundwater-dependent ecosystems. She contributes to technical cooperation projects through training, water quality monitoring programme design and data interpretation. She has participated in over 30 national and international research projects on water resources and has authored more than 40 scientific publications.
