**Mr Robert Vautard**

Senior Scientist

French National Centre for Scientific Research

Mr Robert Vautard is a senior climate physicist with over 200 peer-reviewed publications and extensive expertise in extreme events, climate change attribution and regional climate dynamics. He has led major climate research institutes in France, including the Laboratory of Climate and Environmental Sciences and the Pierre-Simon Laplace Institute. He has also contributed to the development of climate services, notably through the European Copernicus Climate Change Service.
