Conferences, symposia & seminars

Technical Cooperation (TC) Projects

Contributing to Sustainable Development

Human Health

Sustainable energy

Food and agriculture

Radiation technology

Water and environment

Safety

VIDEO: Better Fruit For Neretva Valley

VIDEO: Water Matters: Making a Difference with Nuclear Techniques

Where do we work?

Fellowships and scientific visits **2005**

Expert and lecturer assignments **3509**

Participants in training courses **3041**

EUROPE

ASIA AND
THE PACIFIC

LATIN
AMERICA

AFRICA

Countries/territories
receiving support **124**

Regional and interregional
training courses **209**

National TC projects

Member State
specific

Build on or establish
infrastructure

Need /
country driven

Address problems/needs
at the national level

May involve more than one
counterpart / institution

Regional TC projects

Build on existing
national
infrastructure

Address problems/needs
at the regional level

Mainly HR

Create links between
regional institutions

Aims at sharing
information / expertise
and experience

Promote Technical
Cooperation among
Developing Countries
(TCDC)

Interregional TC projects

Deliver support across
national and regional
boundaries

Address problems / needs
of several states in
different regions

Transregional, global,
capacity building

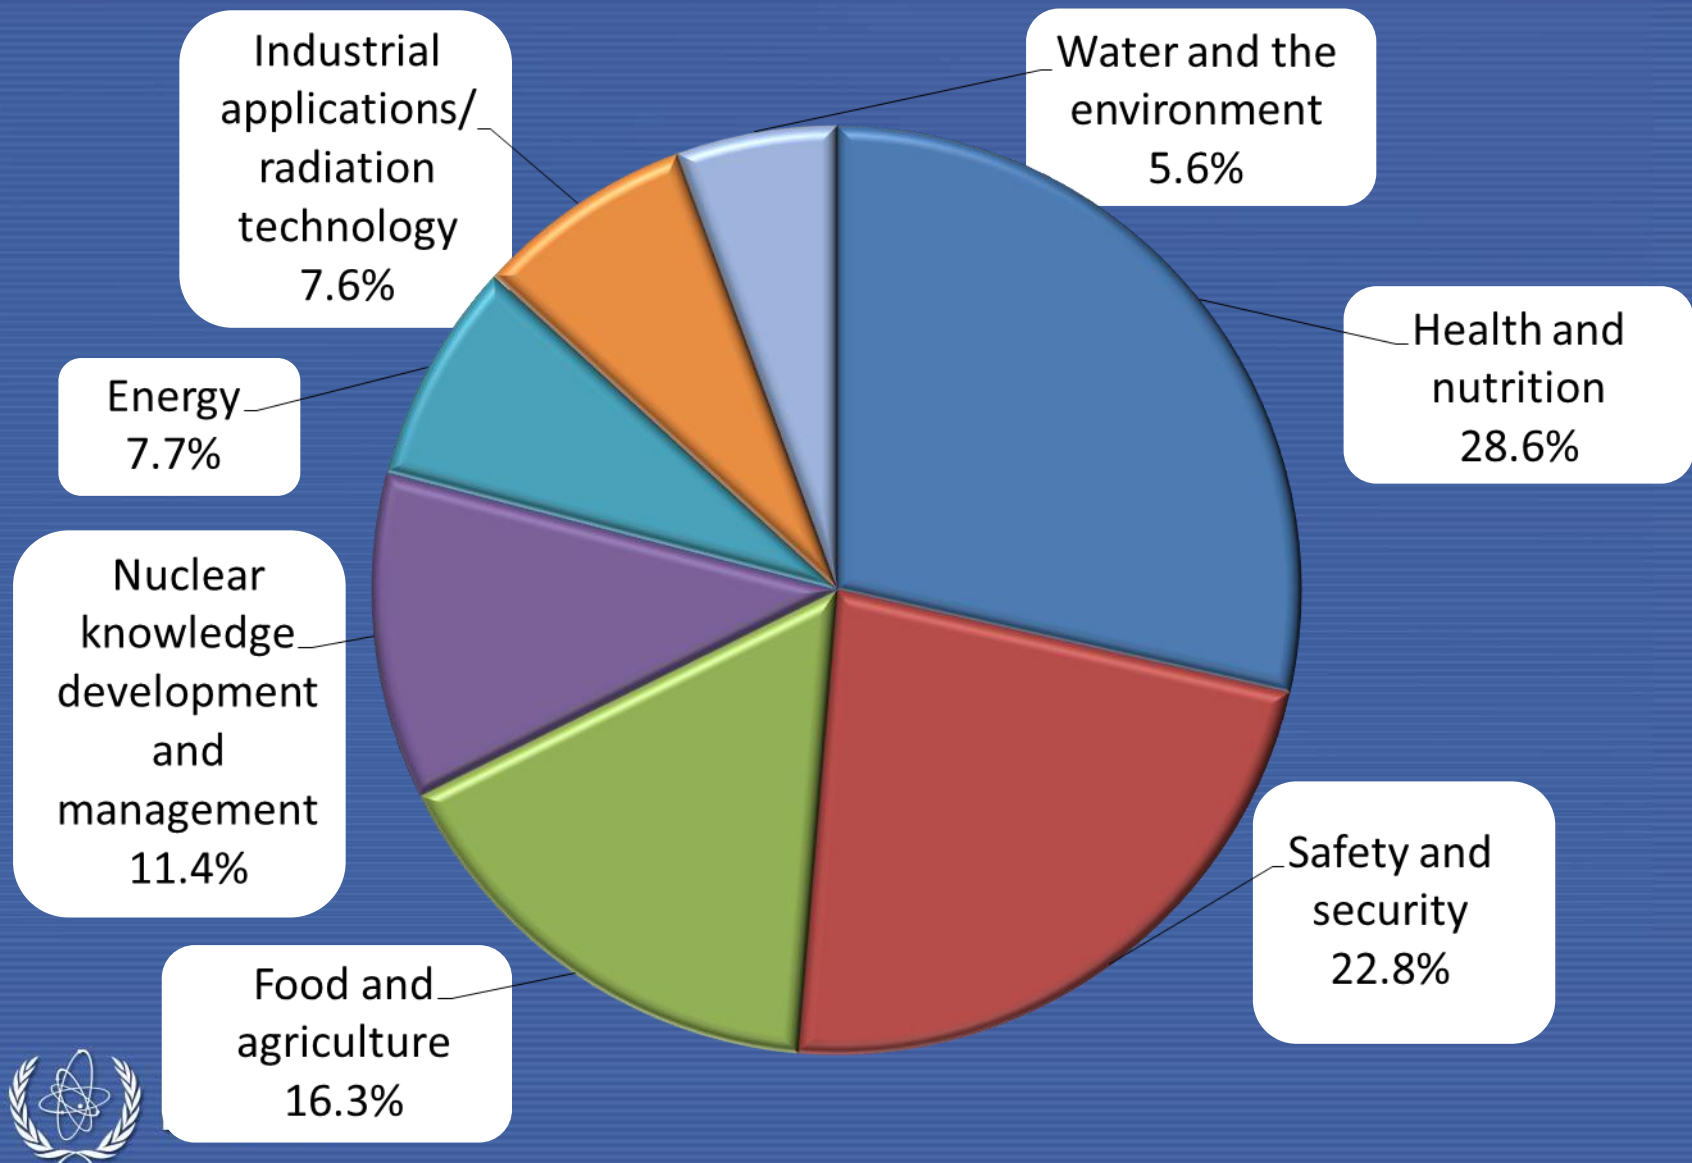

Mainly HR

Usually an
Agency initiative

Small number of
projects

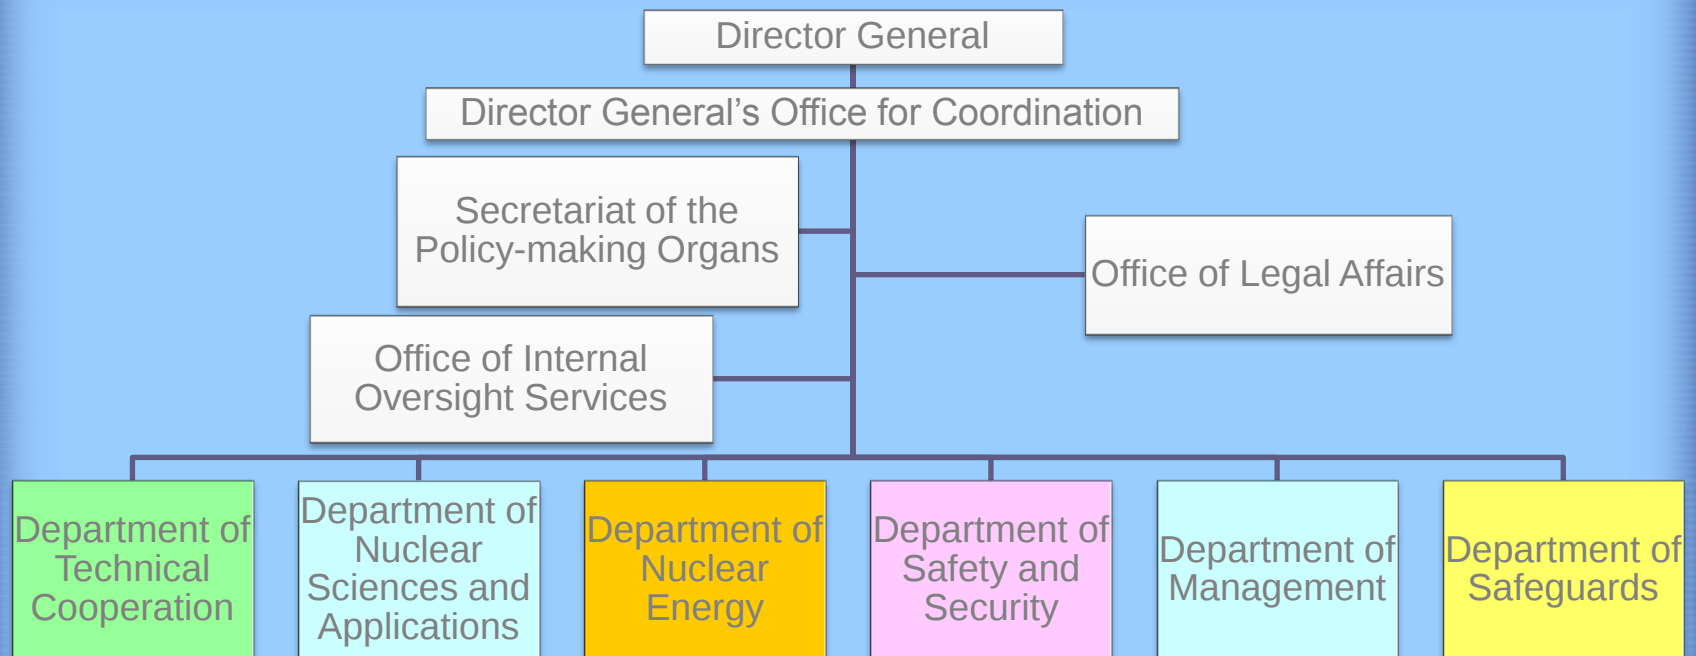

Address
transboundary issues

TCP 2013 actuals by programme area

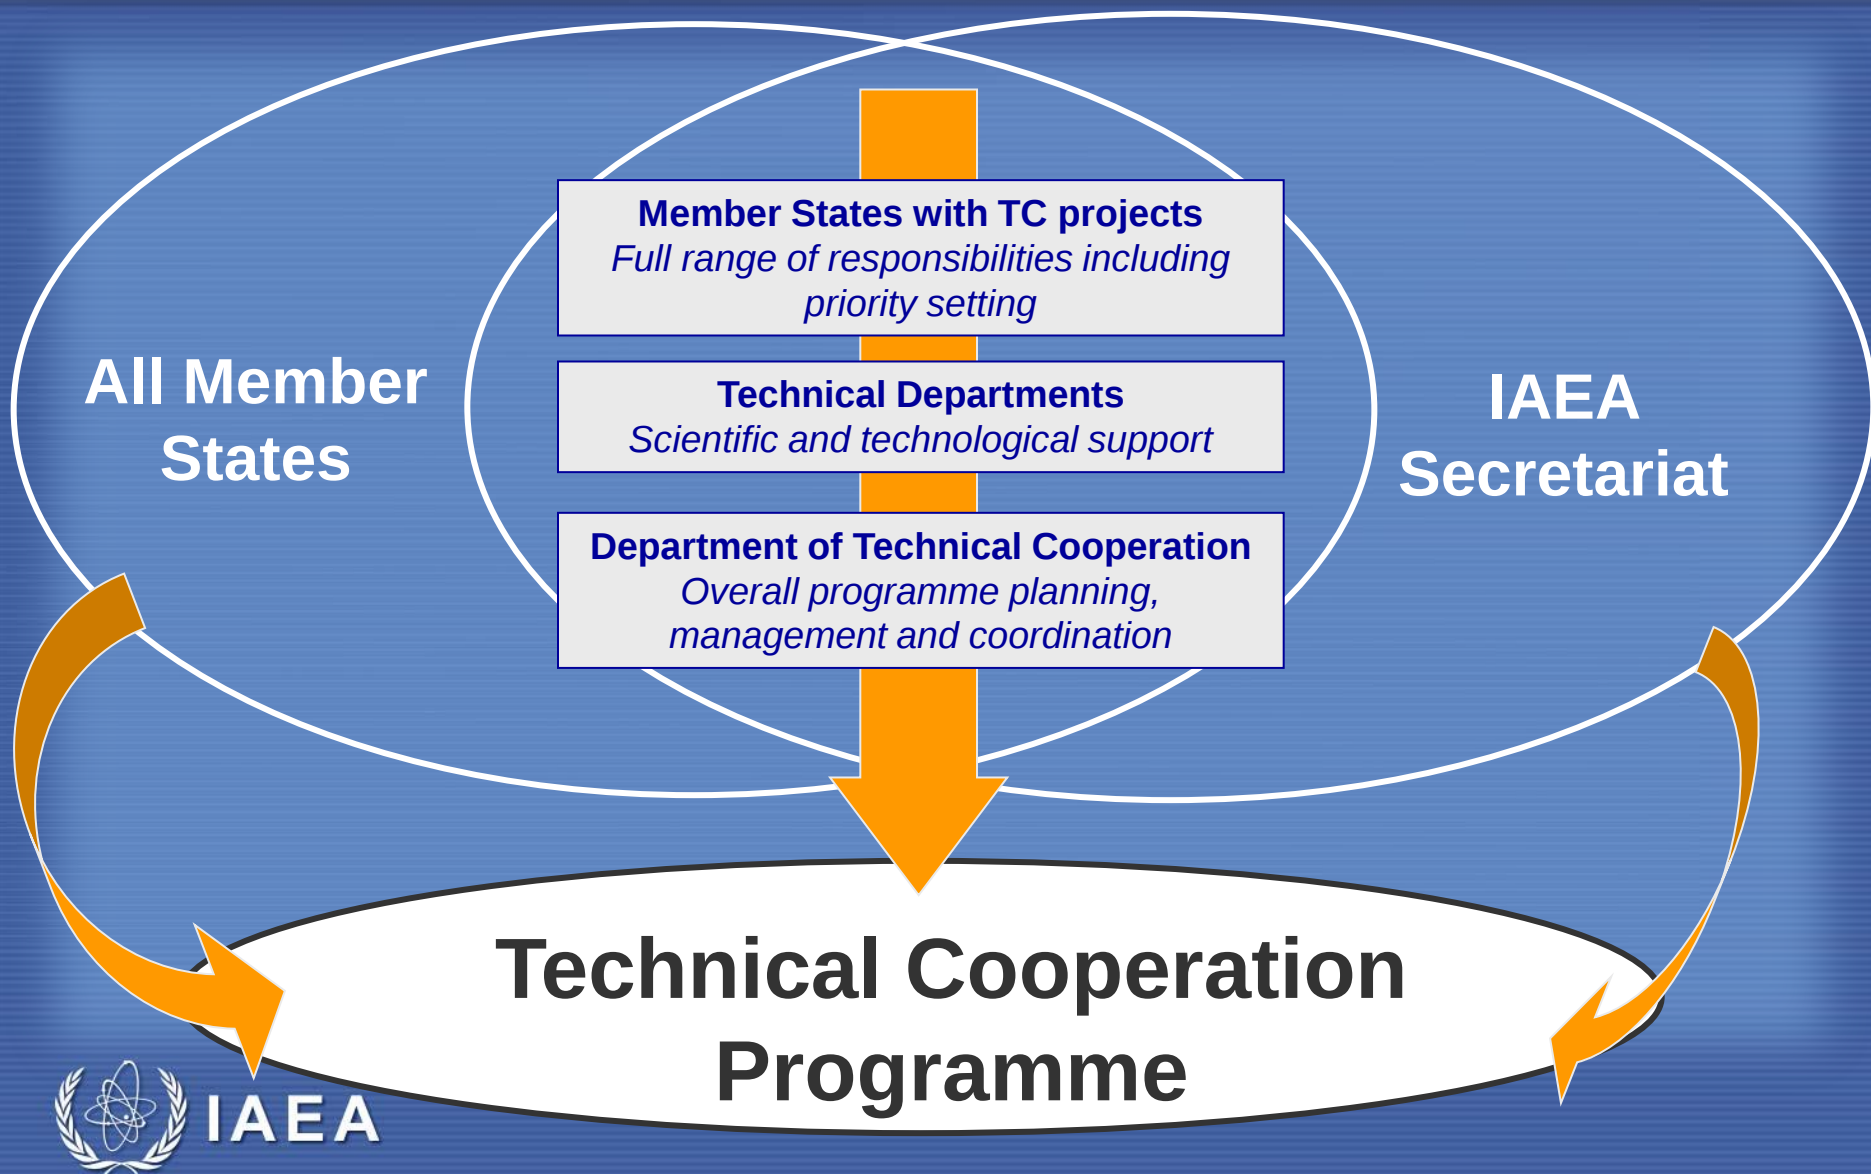

Management of the TC programme

– technical backstopping

Shared responsibility

*Technical cooperation:
delivering results for
peace and
development*
