The Permanent Mission of the Russian Federation to the International Organizations in Vienna presents its compliments to the Secretariat of the International Atomic Energy Agency and has the honour to transmit the following.

Management and operation of the Zaporozhskaya and Chernobyl NPPs is carried out by the Ukrainian operating personnel. A group of several Russian experts provides them consultative assistance.

In the framework of providing technical support, the priority needs of plants are being determined to ensure the safe and sustainable operation of nuclear power units.

Thus, in particular, with the consultative assistance of Russian specialists, the restoration of the power supply of the Chernobyl NPP and the physical protection of the Zaporozhskaya NPP is now being carried out.

The interaction between Russian and Ukrainian specialists takes place on a regular basis in the format of meetings.

While implementing measures aimed at ensuring the safe and secure operation of Ukrainian NPPs the Russian side maintains close contact with the IAEA.

The Permanent Mission of the Russian Federation requests the Secretariat to circulate this information among all IAEA Member States as soon as possible.
