PERMANENT MISSION
OF THE RUSSIAN FEDERATION TO THE
INTERNATIONAL ORGANIZATIONS
IN VIENNA

Erzherzog-Karl-Strasse 182
A-1220 Wien

Tel. (043-1) 282 53 91, 282 53 93
Fax (043-1) 280 56 87

№ 2462-ч

The Permanent Mission of the Russian Federation to the International Organizations in Vienna presents its compliments to the Secretariat of the International Atomic Energy Agency and has the honour to inform about the situation at the Zaporozhskaya NPP (ZNPP) as of June 20, 2023.

During the period from June 13 to June 20, the ZNPP site and its vicinity, Zaporozhskaya TPP (ZaTPP), as well as the city of Energodar were not subject to shelling by the armed forces of Ukraine (AFU). 24 aircrafts launched by Ukraine with the aim of attacks and provocations were detected and suppressed.

Power units No. 1, No. 3 are under scheduled maintenance; No. 2, No. 4 and No. 6 – in a state of cold shutdown; No. 5 – hot shutdown.

The off-site power supply for the ZNPP own needs is supplied via the 750 kV "Dneprovskaya" high-voltage line.

Stocks of diesel fuel required for the operation of the plant's emergency power supply systems are sufficient for more than 23 days of operation.

As of 13:00 on June 20, the water level in the supply channel of ZaTPP is 11.16 m, the water level in the cooling pond of ZNPP is 16.63 m. Work continues on the restoration of ZaTPP, destroyed by the AFU. Completion of these works will make it possible to create a backup power source for ZNPP own needs.

Radiation background at the ZNPP site and beyond does not exceed the established standards.

THE SECRETARIAT OF THE
INTERNATIONAL ATOMIC ENERGY AGENCY
Vienna

Recruitment of personnel at ZNPP continues. There are enough employees at the ZNPP to carry out the safe operation of the plant in the cold and hot shutdown mode, as well as to carry out scheduled maintenance work.

Up-to-date information on the current situation at the plant is available at ZNPP website (<https://znpp.ru>) on the permanent webpage "Current status of the Zaporozhskaya NPP" with daily updated information.

During the rotation of IAEA specialists on June 15, 2023, the Ukrainian side violated the safety and security guarantees provided by it to observe the ceasefire regime. At 17:00, the AFU attempted to break through the defense of the settlement of Pyatikhatki, located five kilometers away from the crossing of the battle contact line. As a result of this incident, the movement of the IAEA representatives to the Ukrainian border crossing point was paused for security reasons and postponed for two hours.

The Permanent Mission of the Russian Federation requests the Secretariat to circulate this information among all IAEA Member States as soon as possible.

The Permanent Mission of the Russian Federation avails itself of this opportunity to renew to the IAEA Secretariat the assurances of its highest consideration.

Vienna, "22" June 2023
